

# Our Services

## MICRO & CHEMISTRY LABORATORY SERVICES

- » Food testing (especially raw milk)
- » Water testing
- » Qualitative Microbiology (Pathogens & Spoilage Organisms)
- » Pharma & Medical Devices (Validation, Endotoxins & Antibiotics testing, Bioburden & Sterility testing)
- » Food Allergen testing
- » Nutritional Analysis

## FOOD SCIENCE CENTER

- » Challenge studies
- » Process validation
- » Analytical services
- » Product development support
- » Shelf-life & stability studies
- » Probiotics testing
- » Disinfectant & Antibacterial testing
- » Bespoke laboratory services

## AUDIT & CERTIFICATION

- » JAS-ANZ accredited Certification Body
- » Food Safety Certification Services
- » GFSI Programs (SQF, BRC, Freshcare, GLOBALG.A.P., FSSC22000)
- » HACCP, GMP, GAP Certification
- » Retailers Programs (HARPS, ALDI, Coles, Costco, McDonald's, Spotless)

## LABEL REGULATORY COMPLIANCE

- » Food & non-food label and product conformity with expertise in Australian standards & regulations
- » Extensive experience with retailers & global suppliers across wide range of product categories
- » New Product Development consulting
- » On-site training

## DIGITAL SOLUTIONS

- » EnviroMap
- » QualMap
- » Crystalchain
- » MyMXNS

Want to learn more about our services ?

## Who we are

Food safety and nutrition are major public health challenges that are integrated in public health policies in many countries. More broadly, protecting health entails the security of products that could, in their daily use, risk the health of consumers.

With over 50 years of experience in food safety and quality, through Silliker, a company created in 1967 and acquired in 1997, Mérieux NutriSciences has won the confidence of the food industry and extended its expertise to several industrial sectors: Water and Environment, Pharma and Medical Devices, Personal Care and Cosmetics and Consumer Goods.

Mérieux NutriSciences offers companies around the world analysis, auditing, and consulting services across the value chain: from product design to manufacturing, all the way to distribution. Its accredited laboratories provide the same level of quality across the world.

A presence in **26** countries  
 More than **100** accredited laboratories worldwide  
 More than **7000** people

## SAFETY & QUALITY RIGHT ACROSS YOUR PRODUCT LIFECYCLE

### PROCESSING

- » Environmental Monitoring Programs supported by MXNS EnviroMap digital solution
- » Label check: Nutrition Information Panel, Health claims, Ingredients list, etc.
- » Process validation
- » Site auditing & consulting
- » Finished product safety & quality analyses (chemistry, microbiology, nutrition, etc.)

### DISTRIBUTION

- » Environmental testing
- » Inspection & Auditing
- » QualMap: Suppliers assessment digital solution
- » Crystalchain: blockchain platform for supply-chain transparency

## SAFETY & QUALITY RIGHT ACROSS YOUR PRODUCT LIFECYCLE

### PRODUCTION

- » Raw materials safety & quality analyses
- » Safety HUD: Online platform for raw materials risk assessment
- » Supplier approval and monitoring
- » CrystalChain: Blockchain solution for supply-chain transparency

### DEVELOPMENT

- » Shelf-life studies
- » Nutrition & composition analyses
- » Health claims and nutritional label development
- » Non-food claims & regulatory compliance
- » Regulatory consulting & Regulatory Update online platform
